cevi i fitting

HT (PP) cevi i fitting za kućnu kanalizaciju

Cevi za sisteme kućne i ulične kanalizacije zajedno sa odgovarajućim spojnicama su predviđeni za uklanjanje svih vrsta otpadnih voda. Veoma lako se postavljaju, a spajaju se međusobno spojnim elementima pri čemu se gumenim prstenovima obezbeđuje potpuna zaptivenost spoja. Cevi izdržavaju temperature do + 90°C. Otporne su na slanu vodu, alkohol, kiseline, alkale, sulfate, agresivne gasove i sve vrste deterdženata. Sa druge strane, ne mogu se koristiti kod otpreme vode koja sadrži visok procenat benzena, benzina (nafta) ili acetona.

Osnovne karakteristike, tehnički podaci i primenljivost

- veoma lak materijal
 - jednostavan i lak način kako transporta tako i rukovanja
 - brzo i jeftino montiranje
 - spojnice su otporne na vodu i druge tipove tečnosti
 - otporne su na koroziju u alkalnim, kiselim ili agresivnim okruženjima
 - dobar su električni izolator, a takođe su otporni na mehanički uticaj
 - vek trajanja duži od 50 godina
 - praktično bez troškova održavanja cevovoda
 - spojevi sa mufovima i zaptivni prstenovi su napravljeni od EPDM gume (EN 681)
- SRPS-EN 1451
 - Flame retarant DIN4102 B1
